

OM443 Registration Form

OM443: Supply Chain Modeling Practicum

Prereq: SMG OM 441 or OM 465, and instructor's consent.

This class will provide hands-on exposure to modeling a real-world multi-echelon supply chain problem. Students will work in teams and be assigned to solve a supply chain problem presented by a local company. Companies include Boston Scientific, Gillette, and Seven Cycles. The projects will focus on determining the optimal solution as well as near-optimal solutions that can be more easily implemented in practice. 4 credits.

Because space is limited in this course, the decision on who will take OM443 will be made by the Operations & Technology Management department in conjunction with the Undergraduate Program Office.

If you are interested in taking OM443 in Spring 2010, please locate this form on the Virtual UPO <smg.bu.edu/upo/siteIndex.shtml#h>, complete the fields below, save the file, and send this as an email attachment to smgupo@bu.edu by Friday, November 6, at 5:00 p.m. Prof. Sean Willems will contact you concerning the next steps in the registration process for OM443.

Personal/Contact Information:

(Please PRINT in ALL of the following fields!)

Last Name: _____	First Name: _____
BU ID: _____	Email Address: _____

I will have completed OM 441 or OM 465 before the Spring 2010 semester.
